

**Bobbie**

9/30/2019

Wide ossicones, triangle shaped face, more orange in coloration than the other Masai, very large chest spots

**Charlie**

08/31/2022

Narrow face, light coloration, smallest of the four calves.

Mother is Zuri. Father is Enzi

**Conner**

08/02/10

Reticulated male. Conner is missing part of his right eyelid due to a trauma suffered when young. Lean body. While lines of coat appear to bleed into brown spots. Lots of white on face. Very bright and active.

**Digi**

6/20/11

Masai female. Friendly. Long tail hair. Ossicones fluffy on top and bow in slightly. White face. Mother of Sammie (12/09/2020)

**James**

09/26/20

Long ossicones with fluff on top, narrow face, star on his right cheek, shy

**Jon Pederson (JP)**

9/13/13

Reticulated male. Jon is a confident and personable animal. He is much darker in coloration than most of the reticulates. His face and head are darker than the others and he has some black areas within his spots. He is built very stocky and has thick ossicones.

**Kipawa**

1/20/13

Reticulated, male. Kipawa is smaller than most male giraffes his age. He has narrow set ossicones and is missing the tip of his left ear. Kipawa is extremely tractable and is a very reliable feeder from the public.

**Lance**

11/07/14

Reticulated male. Dark coat, darker than most giraffes. Face is also dark with less white around his eyes. Long, slightly droopy upper lip. Calm and well adjusted.

**Logan**

02/13/14

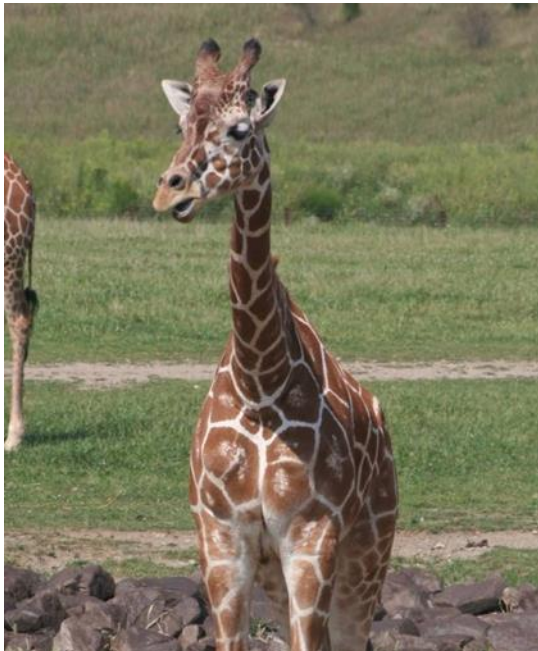

Reticulated. Half-brother to Lance. Lighter in color than Lance, Faint white spots with brown spots. Slender face, white around eyes. Very curious, outgoing and calm.

**Nitro**

07/25/10

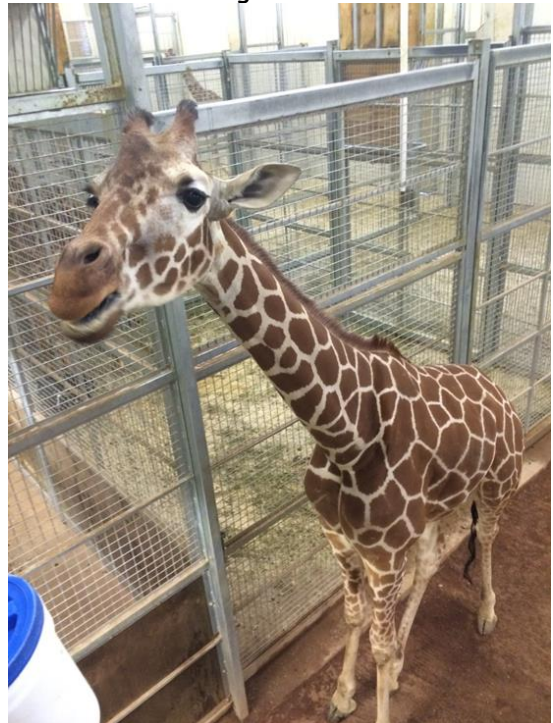

Male, reticulated. White spots within brown spots. Lots of bold spots on his face and up his ossicones, very curious, tractable. Often seen chewing/sucking on the other giraffes' manes, ears and ossicones.

**Kasamba (Sam)**

12/11/10

Reticulated male. Sam has very short ossicones and has a bold, defined pattern of spots. His face has more white than the others; he is very tractable and curious. He likes to play with things in his mouth and is often seen clicking his tongue. Curious and friendly. Long tail hair.

**Ralph**

06/28/2020

Mother is Zuri. Father is Enzi. Lighter in color than the two female calves.

**Sammie**

12/09/2020

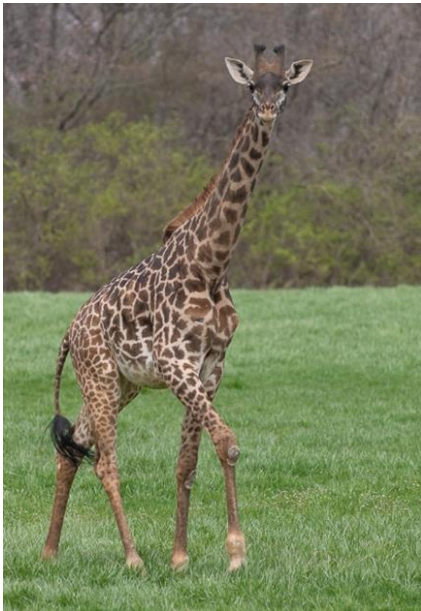

Mother is Digi. Father is Enzi.  
White around the eyes. Fluffy ossicones.

**Schaefer**

08/26/2020

Mother is Jana. Father is Enzi.  
Tallest of the four calves.  
Dark face, thick ossicones

**Utu**

12/8/09

Male, reticulated, long tail hair, left ossicone broken and bent over, many bumps on head, light face, dark brown spots, friendly, grandson of former zoo giraffes Kenya and Tsavo.

## Waibig

08/22/11

Male hybrid (Masai-Nubian). Waibig is our only hybrid giraffe. His markings resemble a Masai, but he has more spots on his face than the other Masai. He has tufts of hair on the top of his ossicones that stand out. Tractable, a more stand-offish giraffe than the others but will still eat from the public.

## Zuri

04/07/10

Masai female. Zuri is the largest of the females, tall with a large head and long face. She has a large amount of white around her eyes. Somewhat shy. Mother of Ralph (06/28/2020) and Charlie (08/31/2022)
